

Seminar

Cropping Systems and Soil Resilience

Please join us for :

**Dr. Jerry Hatfield - USDA -
Agriculture Research Service**

Dr. Jerry Hatfield serves as the Director of the National Laboratory for Agriculture and the Environment and the Midwest Climate Hub in Ames, Iowa. His research focuses on the soil-plant-atmosphere system to improve the resilience of cropping systems to climate change and the development of techniques to assist decision-making in agriculture. He will discuss weather extremes and their impacts on agriculture and describe the principles needed to build resilience in your farming systems.
